AIM : CAR RENTAL MANAGEMENT SYSTEM

Project Definition : We will be creating "Vehicle Rental Service" program, which is a menu driven c program for vehicle sellers and is intended to be used by vehicle buyers to view or find available vehicles. some of the menu options include, view all vehicles, view vehicles of specific company, view vehicle of some category, view vehicle of some color etc.

Project Description : We will be creating c language structure named "vehicle" whose fields will be model, price, manufacturing date, company, category, color etc. we plan to use linked list to store vehicle information entered by the sellers. we will be writing functions to perform specific task on the original linked list.
